SUMMARY

Experienced senior software engineer with 10 years of proven success leading high-performing teams in delivering quality software products. Strong technical background in frontend engineering with excellent leadership, communication, and problem-solving.

SKILLS

Technical Skills   React, Typescript, NodeJS, GraphQL, React-query, Redux, Apollo, React Testing Library, Cypress

Soft Skills   Team-management, Couching, Problem-solving, Time-management, Collaboration, Attention to details

EXPERIENCE

Senior software engineer   Aug 2019 - Present
Revolut   *Dubai, UAE/ Moscow, Russia*

- Led the frontend development efforts for the credit department of a bank, overseeing the full creation of both internal and external tools. Achieved 100% test coverage for all tools developed, ensuring high quality and reliability with server uptime up to 99,97;
- Successfully optimized a website with more than 8 million users per month by improving its load speed by 99%, based on Google Insight recommendations. Implemented best practices in web performance optimization, resulting in improved user experience and higher engagement;
- Collaborated with cross-functional teams to develop and implement innovative solutions for complex technical challenges. Demonstrated strong problem-solving skills and attention to detail in all projects undertaken with a team of up to 12 members.

Senior software engineer   Mar 2018 - Jun 2019
Level travel   *Moscow, Russia*

- Realized the user interface for both the company's website and internal software applications. Completed optimizations to significantly reduce the build time from 2 hours to just 20 minutes, resulting in increased productivity and faster time to market.

Software engineer   May 2017 - Mar 2018
Open bank   *Moscow, Russia*

- Contributed to the development of the "Digital Mortgage" project, overseeing the creation of internal tools and a React Native mobile application. Introduced A/B testing, reduced page load time by 50%, and increased conversion rate by 20%.

Co-founder / CTO   Sep 2014 - May 2017
JureCloud   *Moscow, Russia*

- Spearheaded the development of JureCloud as CTO. Led a team of 6 engineers in creating an innovative platform that automates legal document creation based on pre-existing templates, without human intervention. Successful launch achieved 50% reduction in the document creation time.

Software engineer   Aug 2013 - Sep 2014
Netbell   *Moscow, Russia*

- Produced 3 projects by designing various frontend solutions using jQuery, D3.js, and different CSS preprocessors.

EDUCATION

Master of Business Informatics, High School of Economics, Moscow   Sep 2015 - Aug 2017
Bachelor of Business Informatics, High School of Economics, Moscow   Sep 2011 - Aug 2015
Software engineering team-lead training program, Otus, Moscow   Oct 2020 - Aug 2021

LEADERSHIP

ex-Head of MoscowJS meetup

As an event organizer, I managed a renowned frontend technology meetup in Russia, which included 5 offline meetups for 150-200 attendees each and a 50th-anniversary meetup for 350 people. I adapted to COVID constraints by organizing various online activities such as open tables, courses, and summits. My organizational and project management skills ensured the success of these events, both offline and online, and provided an informative and engaging experience for attendees.
